

Porsche Cayenne Diesel with RUF Power Upgrade

The new Cayenne Turbo is powered by a direct-injected 3.0 liter V6 turbo engine. With its eight-speed Tiptronic S transmission and a reduced vehicle weight, this SUV feels and drives lighter than ever before.

For whom the standard power of 240 hp (176 kW) is not sufficient, RUF Automobile GmbH, in the bavarian town of Pfaffenhausen, now offers two performance increases:

In Upgrade 1, performance is increased to 288 hp (212 kW) through the optimization of the electronic engine management system. The torque rises by 22 lb-ft (30 Nm) to a maximum of 428 lb-ft (580 Nm). The price, including installation is 3,850.- €, plus VAT.

For Upgrade 2, power increases to 310 hp (228 kW) by the incorporation of a modified turbocharger and the optimization of the engine management system. The maximum torque is raised to an incredible 465 lb-ft (630 Nm). The price, including installation, is 7,300.- € plus VAT.

Both performance enhancements are available immediately.
